What values of x, y, z will give what values of a ?

① If $(x < y) \& (y < z)$, and $x, y, z \in [0, 200]$, then $a = 200$

② If $(x < y) \& (y \geq z)$, and $x, y, z \in [0, 200]$, then $a = 0$

③ If $(x \geq y) \& (x < z)$, and $x, y, z \in [0, 200]$, then $a = 100$

④ If $(x \geq y) \& (x \geq z)$, and $x, y, z \in [0, 200]$, then $a = 50$.
