

ENGR1202 – Computer Engineering Assignment

Assignment 1 – Loading Software Tools

You will follow the lab exercise procedure below. Once you have run the exercise, demonstrate the software tool running on your PC to the lab TA and hand them the Lab Checkout sheet.

You will not be required to complete a written lab report.

You can use the space in EPIC 2130/2132 for this lab work, but using your own PC/laptop is preferred.

Materials needed

- MSP430 board & cable (we provide)
- PC for loading Code Composer Studio (either you provide, or use the ones in EPIC2130)

Objective of Lab

In this lab exercise you will load Code Composer Studio on your laptop or PC. You will use this tool for labs 2, 3, and 4.

Steps

1. If you are using your own PC, download and install Texas Instruments' Code Composer Studio on your own PC. Alternatively, you can use the PCs in EPIC 2130/2132. Follow the directions provided in the TI MSP430 Launchpad box.
2. Open Code Composer Studio. Show that you know how to use the wizard tool to start a project.
