Research Project for Dr. James Conrad

Project title:  Change Embedded System Notes to support M30626FHPFP board

Date posted:  6/25/05

Type of research:  xx Minor effort (0-40 hours)
                 xx Embedded Class Project (41 - 90 hours)
                 __ MS without thesis project (91 - 150 hours)
                 __ Special Topics Class research (151- 400 hours)
                 __ MS Thesis (401 - 2000 hours)
                 __ PhD Dissertation (2000+ hours)

Paid?  __ Research Assistantship available
       xx no funding
       __ possibility for funding
       Funding source ________________________________

Description:
The Renesas board M30626FHPFP is similar to the M30262 board, but there are some port differences. The class notes for ECGR 4101/5101 need to be changed to reflect these port changes. The deadline for this effort is September 1. Will involve reading the board specs and updating PowerPoint files.
