

```
// Append Algorithm
// List-T * Append (List-T * recordings, List-T * new_list
// Jim Conrad, 2016-09-30                                -entry);
// append a new voice recording onto the
// end of the list
```

if there are no current recordings, make this one
the first one and exit

Set next recording = recording (point to next element)

Do while next recording is not null

cur recording = next recording

next recording = cur recording → next element

Set cur recording → next element to new_list.entry

~~Set new_list~~

exit
